

Masse Environmental Consultants is a Nelson based company that provides environmental consulting services to the mining, forestry, hydropower, construction and government sectors. We have a summer student position available to assist with a variety of field and office work this summer including environmental assessments, baseline inventories (fisheries, vegetation and water quality/quantity) and monitoring. This position is partially funded by Columbia Basin Trust Summer Works Program.

Eligibility criteria include:

- Must live in the Columbia Basin
- Must have a valid vaccine passport
- Must be registered as a full-time student in the spring and fall of 2022
- Must have completed the first year of a technical diploma or second or third year of a university degree in a related field

The ideal candidate would also meet the following requirements:

- Have good oral and written communications skills
- Proficient with word processing and data management software
- An understanding of study design and analysis
- Have plant and fish identification experience
- Willing to travel and work long hours outdoors in variable weather conditions
- Have orientation skills and familiarity with GPS
- Open to a variety of field work
- Ideally would have a current Level 1 Occupational First Aid certificate and electrofishing certification
- Have a valid driver's license but not essential

This seasonal full-time position could start between April 18, 2022 & May 2, 2022 and will run through August 27, 2022. To apply for this position, please submit a resume and cover letter to: [info@masseenvironmental.com](mailto:info@masseenvironmental.com) by March 14, 2022. Only qualified individuals being considered for the job opening will be contacted for an interview.
